

BRISEPAD

The first deflationary launchpad for Brise chain

We help fuel the future of mass-market blockchain applications building in the brisechain ecosystem

INTRODUCTION TO BRISEPAD

Brisepad is designed with a singular purpose in mind — **to help fund and support the development** of the next generation of blockchain projects on brise chain.

Some of these projects have the potential to grow and **become the Uniswaps, Aaves, and OpenSeas** of the brisechain ecosystem. **Just imagine being one of the very first investors in the Ethereum, Solana, or Avalanche ecosystems.**

WITH BRISEPAD

our members get the chance to turn back the clock to participate in the very first wave of projects building on one of the world's highest performance blockchains..

With our extensive expertise and track record of success, we aim to ignite the BRISE ecosystem with a Cambrian explosion of high-quality projects.

With the introduction of Brisepad, we now have a way to organize, bootstrap,

and incubate the first wave of projects building on Brisechain.

With several deflationary triggers tied to selling, staking, and IDO participation, we aim to promote stable long-term growth for our backers and participants.

We have the expertise, resources, knowledge, and experience to underlie a launchpad that will not only attract the highest quality projects but also inject a wave of fresh innovation into the Brisechain ecosystem.

KEY FEATURES

Deflationary tokenomics

BRISEPAD will benefit from multiple deflationary mechanisms, including burn fees and sell fee redistributions (more details below).

02

Tiered allocation system

Guaranteed allocation tier system

03

High quality projects

Our thorough screening process, manual reviews, and in-depth competitor analysis ensure we work with only high quality projects with real potential.

How it works

BRISEPAD

The first deflationary launchpad on brisechain

The main deflationary mechanisms of Brisepad

include a **10% fee** on all token sales (sell orders) and **early unstaking fees of up to 25%.**

7% of the token buy and sale fee will go to the staking reward contract and 3% will return back to the liquidity.

Distribution of sell fees:

7.5% of the fees will be rewarded to stakers in \$BRISE.

2.5% will be burned forever.

ROADMAP

Q1

conceptualization 

Brainstorming 

Team recruitment 

Q2 (phase 1)

planning

Project site creation

Whitepaper launch

Contract deployment

Partnership

team kyc with brise

presale

launch

Q2 (phase 2)

CoinMarketCap listing

Coingercko listing

Huge marketing

Ambassador program

Influencers partnership

Q2 (phase 3)

launchpad testnet launch

Launchpad mainnet launch

Deployment of governance voting mechanism
Cex listing
Further announcement

Q3

Launch of a new dapp (brise bank)
Registration of company name in USA
NFT release to our top 50 holders
End of the year party

Q1 (2023)

1st Conference
2nd cex listing
Huge marketing
Football club partnership

Early unstaking fees:

There will also be an option to unstake early. This will apply a 20% **burn fee**. However, if users wait 4 weeks to unstake, there will be **no fee**.

IDO DETAILS:

Amount to raise: 100,000\$ or
100,000,000,000 \$BRISE
